BEST SOLUTIONS DESERVE BEST REASERCH

Idea, Innovation, Implementation are the three pillars of QuikProto strategy. Our path breaking work on Cyber Defence with specific focus on APTs has been the demand of governments, industry and digital enterprises across the world. Quikproto security stack offering is all inclusive and focussed on providing the most important security feature to our customers, the "Peace of Mind".

IDEA INNOVATION IMPLEMENTATION

Our technology and consulting team not only wears your shoes but also pressure tests it for peace and war time scenarios and makes your planning more robust and make your implementations fool proof.

Our founders have worked in the deepest of threat scenarios and it would not be out of place to mention that you will be comfortable with our "knowledge", "need to know" behaviour and "total cost of risk" attitude.

We provide solutions to the Armed Forces, National Security Agencies, Critical Infrastructure Sectors (Energy, Power, Transport, Manufacturing, Health Care, Government, BSFI, Telecom, Smart Cities), Education, Agriculture, Commerce and every Digital Citizen.

SUCCESS REQUIRES CLEAR THINKING

VISION
Design & Develop Ethical Security Products

MISSION
Leadership by IP Creation

PRODUCTS

TRUSTEDICON

Platform for Secure Data Storage & Management

- Provides secure remote access, secure web browsing, protection against cyberattacks (fishing, MitM and MitB).
- Provides protection against data leakage, document loss and malicious copying or transfer.
- Enables establishments to run secure mobile offices – allows officers & staff to work remotely or from public infrastructure.
- Packaged as portable secure drive.

TRUSTEDDOC

Platform for Enterprise Digital Rights Management

- Seamlessly secures documents against unauthorised usage (prevents document copying, cut & paste, sharing through mails/ messages).
- Integrated with office work flow, file system and data archives.
- Supports military grade encryption (open to use naval crypto), multiple Operating Systems, ORC scanners and file formats.
- Provides Hybrid Encryption to create unique Encryption each time with Dynamic Key Management

TRYAMBAK

Hypervisor Based Security down to Kernel Level

- Innovation
  - Virtualization technology based kernel protection
  - Indigenous architecture and design
- Covers Entire Spectrum of Devices
  - Protects Linux, Windows, FreeBSD Android etc.
- Competitive Landscape
  - Unaddressed market opportunity
  - First in India and among few products in the world that provides secure Hypervisor based protection

EXPERTISE

DETECT

Real time detection of APTs and Zero Day vulnerabilities using behavioural rules, without any reliance of signature validation.

01 → Identify

IDENTIFY

Identifies the attack points and uses deep introspection to safely monitor the malware activities.

02 → Detect

PROTECT

Hardware enforced isolation ensures that the attack is identified and blocked before impacting the system.

03 → Protect

Quikproto's
Cyber Solutions

RESPOND

Configurable policies enable the incident be reported to the administrator via the selected notification mechanisms.

05 ← Respond

ANALYSE

Reverse engineers the malware for forensics and analysis.

04 ← Analyse
